Integrations

WHAT SOLAROPS MANAGES •

Sales and CRM

01

Gamified pipeline with XP, levels, and leaderboard. Every prospect becomes a full 360-degree customer

New Installations

02

Track installations from signed contract to commissioned system. Field updates arrive camera-first,

Operations and Maintenance

03

Eight-stage work-order pipeline. Labor, parts, revenue, and profit calculated per job. Margin visible before

Service Dispatch

04

SolarEdge alerts ranked by severity flow directly into the platform. One tap to acknowledge and dispatch

Contractor Management

05

Dedicated portal for onboarding, field reporting, invoice submission, and admin review. Clean separation

Inventory

06

Equipment, tools, and providers in one view. Parts and availability confirmed before the truck leaves the

Client Profitability

07

Revenue, cost, and margin tracked per customer. Accounts driving growth and those eroding margin become

Billing and Quotes

08

Branded invoices and one-click customer quote approvals. Synced automatically to Xero. No manual

THREE ACCESS LAYERS. ONE SYSTEM.

Everyone sees exactly what they need to. Nothing more.

ADMIN

Full visibility across every module, every team member, and every financial record. Admins configure access and maintain control over the

STAFF

Team members access only the modules relevant to their role. Permissions are set by admins and enforced automatically. No gatekeeping, no

CONTRACTORS

A completely separate portal for onboarding, job delivery, field reporting, and invoicing. Architecturally isolated from

ENTERPRISE-GRADE SECURITY

Built to pass a compliance review without preparation.

- End-to-end encryption in transit and at rest
- Row-level database access control per user and role
- JWT authentication with cryptographic session tokens
- API keys and secrets server-side only, never in browser code
- Contractor portal architecturally isolated from internal data
- Rate limiting, sanitization, and input validation on all endpoints

NATIVE INTEGRATIONS

SolarEdge Monitoring Platform

Live site data and alerts flow directly into dispatch

Xero Accounting

Invoices, payments, and reconciliation sync

Companies that run on SolarOps stop reacting to what already happened and start operating on what is happening now.

See it on your own operation.

One session. Watch a live job move from dispatch trigger to paid invoice, with margin calculated in front of you.
