WHAT SOLAROPS MANAGES

01 Sales and CRM

Gamified pipeline with XP, levels, and leaderboard.
Every prospect tracks to a full 360-degree customer record.

03 Operations and Maintenance

Eight-stage work-order pipeline with per-job margin.
Labor, parts, and revenue calculated before the job closes.

05 Contractor Management

Dedicated portal for onboarding, reporting, and invoicing.
Clean separation from internal operations by design.

07 Client Profitability

Revenue, cost, and margin tracked per customer.
Growth accounts and margin drains visible at a glance.

02 New Installations

From signed contract to commissioned system.
Camera-first field updates sync in real time from any phone.

04 Service Dispatch

SolarEdge alerts arrive ranked by severity.
One tap to acknowledge and dispatch before the customer calls.

06 Inventory

Equipment, tools, and providers in one view.
Stock confirmed before the truck leaves the yard.

08 Billing and Quotes

Branded invoices with one-click customer quote approval.
Payments sync automatically to Xero.

THREE ACCESS LAYERS. ONE SYSTEM.

Everyone sees exactly what they need to. Nothing more.

ADMIN

Full visibility across every module, team member, and financial record. Configure access and maintain full control over the entire operation.

STAFF

Access only modules relevant to your role.
Permissions set by admins, enforced automatically.
No gatekeeping, no accidental exposure.

CONTRACTORS

A separate portal for onboarding, field reporting, and invoicing. Isolated from internal operations and staff data by design.

ENTERPRISE-GRADE SECURITY

Built to pass a compliance review without preparation.

- End-to-end encryption in transit and at rest
- Row-level database access control per user and role
- JWT authentication with cryptographic session tokens
- API keys and secrets server-side only, never in browser code
- Contractor portal architecturally isolated from internal data
- Rate limiting and input validation enforced on all endpoints

NATIVE INTEGRATIONS

SolarEdge Monitoring Platform

Live alerts ranked by severity flow directly into dispatch and O&M.
No tab-switching, no missed triggers, no manual export.

Xero Accounting

Invoices, payments, and reconciliation sync automatically.
No manual entry, no duplicate data, no end-of-month scramble.

"Stop reacting to what already happened.
Start operating on what is happening right now."

See it on your own operation.

One session. Watch a live job move from dispatch to paid invoice, with margin calculated in front of you.
